

My pets are like my family because.....

I am an only child so my dog, Bailey, is like my sister and my best friend. We go for long walks together, we sit on the couch together and watch movies, or on my bed playing video games. I tell her all about my day she always listens.

In the garden I have taught her lots of tricks, but my mammy taught her manners. I've taught her to play fetch, but she doesn't always bring it back. She gives me the paw and a high five and I give her a treat for it, usually a blueberry because they are her favorite. Washing her is great fun but everywhere gets really wet when she shakes off the water. She enjoys it when I brush her coat afterwards but I don't enjoy when she sneaks off with my teddy bears.

We have had Bailey for 6 years now and I love to come home from school and see her sitting in the window waiting for me, but she must wait for me to do my homework before we can play. She's always so happy to see me and I love her very much. It is my job every morning and evening to feed her and give her fresh water and to clean up the garden after her. I love her very much.
